

ABSTRACT

Jirák, S. *Liberalization of the Energy Market, Its Analysis, End-user Benefits and Effects, and Electro Energetic Sector: a bachelor degree thesis.* České Budějovice : Vysoká škola evropských a regionálních studií, o.p.s. (College of European and Regional Studies), 2007, 45 pages. Supervisor of the bachelor degree thesis : Doc. Ing. Antonín Plaček, CSc..

Key words: liberalism, energy market, energy politics, energy conception, nuclear power engineering, primary energy sources, regulation of energy markets

The thesis aims at the general principles of liberalization and liberalization of the energy market. Further, the energy politics both in the European Union and the Czech Republic is defined. Moreover, the legislative norms of the energy politics are given and the energy conception is described. Besides, the liberalization process in some of the EU countries and in the Czech Republic is described; some views on the liberalization are given. Some of the open questions about our (Czech) power engineering are given in the concluding part of the thesis.
